

Using what you have read and concluded on:

1. How people learn,
2. How people learn languages,
3. Learner’s needs, goals and motivations,
4. And how to motivate students

Fill in the following table; specifying essential principles in organizing a teaching approach and how they would translate to specific and meaningful practices in class. An example is given.

Principle	Practical translation
1. People learn by building on prior knowledge.	Before every activity, knowledge should be elicited to link new content to what learners already know.
